

Every chapter and section in the text is organized the same way to help you learn how to find the information you need.

This is how EVERY chapter in the textbook is organized.

- 20) What is the title of chapter two? _____.
- 21) Each section of every chapter starts with a big idea, chapter preview, and chapter project. Write down the **big idea** in chapter one.

- 22) Why do you think the author of the textbook put the **big idea** at the beginning of each chapter? _____

- 23) You can tell the scientific words that are important in every chapter because they are typed in _____ print.
- 24) At the end of every chapter is a chapter study guide, review and assessment, and standardized test preparation questions to help review what you just read. On what page are the **review and assessment** questions for chapter two? Page _____
- 25) How many **review and assessment** questions are at the end of chapter two? _____.
- 26) Notice that the study guide for each chapter gives you all the key concepts and key terms for each of the sections in that specific chapter. Write down one **key term** for chapter two.

This is how EVERY chapter in the textbook is organized
